## Borders:

Measure the center of the quilt from top to bottom through the center. It should measure **39-1/2"**. If it doesn't, make a note of what it does measure.

Measure the center of the quilt from side to side through the center. It should measure the same as the measurement from top to bottom. If it doesn't, make a note of what it does measure.

If they measure the same, you are OK to proceed. If they don't, take an average of the two.

Trim **two lengths** of border #2 to the measurement you have gotten above.

Sew to each side of the quilt. Press toward the border.

Trim the remaining **two lengths** of border #2 to the measurement above **plus 8"**. This should be **47-1/2"**, but use the different measurement if you have averaged.

Sew to the top and bottom of the quilt.

Repeat the same procedure for border #3, except **add 2"** after the sides have been sewn on. This should measure **49-1/2"**.

Repeat for border #4, except **add 12"** after the sides have been sewn on. This should measure **61-1/2"**.

## Finishing:
